THIS PAGE INTENTIONALLY LEFT BLANK

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions such as heart disease, diabetes, and cancer. This has led to an increase in the number of people who are admitted to hospital and the length of their stays.

Another reason for the increase in the number of people employed in the public sector is the increasing demand for health care services in the community. There is a growing number of people who are living with chronic conditions and who need ongoing care and support. This has led to an increase in the number of people who are employed in community health care services such as home care, mental health services, and substance abuse services.

A third reason for the increase in the number of people employed in the public sector is the increasing demand for health care services in the private sector. There is a growing number of people who are able to pay for private health care services, and this has led to an increase in the number of people who are employed in private health care services such as private hospitals, private care homes, and private health insurance companies.

There are a number of challenges facing the public sector in the 21st century. One of the main challenges is the increasing demand for health care services. The population of the UK is ageing, and there is a growing number of people with chronic conditions. This has led to an increase in the number of people who are admitted to hospital and the length of their stays.

Another challenge is the increasing demand for health care services in the community. There is a growing number of people who are living with chronic conditions and who need ongoing care and support. This has led to an increase in the number of people who are employed in community health care services such as home care, mental health services, and substance abuse services.

A third challenge is the increasing demand for health care services in the private sector. There is a growing number of people who are able to pay for private health care services, and this has led to an increase in the number of people who are employed in private health care services such as private hospitals, private care homes, and private health insurance companies.

There are a number of ways in which the public sector can meet these challenges. One way is to invest in health care services. This includes investing in the infrastructure of hospitals and care homes, investing in the training and development of health care professionals, and investing in the development of new health care services.

Another way is to improve the efficiency of health care services. This includes reducing the length of hospital stays, reducing the number of people who are admitted to hospital, and reducing the number of people who are employed in health care services.

A third way is to encourage people to use private health care services. This includes providing information about private health care services, providing financial incentives for people to use private health care services, and providing support for people who are unable to pay for private health care services.

Funded Projects

CITY OF POMONA
Capital Improvement Program Project Details

Project Title: Alley Improvements - Districts 1, 2, 3, 4, and 6 (Revised FY07/08)

Project Description: This project will provide for the construction of alley improvements at various locations citywide. The improvements will include asphalt pavement, concrete "V" gutters, manhole adjustments, alley approaches, directional curb ramps, grading and removals. The alleys are: District 1: 49, 37, 41, 40, 45A, 16, 15, 14, 43; District 2: 202, 209; District 3: 25, 26, 9; District 4: 97,98, 99, 135, 133, 134, 136, 103-107, 137; District 6: 75, 79, 80, 76.

Project Title: Pavement Management Program - Citywide

Project Description: This project will provide for development and implementation of a pavement management system. It is a systematic process that provides, analyzes, and summarizes pavement information for use in selecting and implementing cost-effective pavement construction, rehabilitation, and maintenance programs and projects. Once developed, the pavement data will need to be surveyed and updated biannually.

Project Title: Highway Improvements - Soundwalls for State Route 71

Project Description: Complaints from citizens living along State Highway Route 71 are being received since the completion of the new 60 / 71 interchange. Meetings with the state indicate several years wait before soundwalls can be completed. By agreement, the City can pre-construct such facilities and be reimbursed when state funding becomes available.

Project Title: Street Improvements - Mission Boulevard and SR 71 Grade Separation

Project Description: This project will improve circulation both regionally and locally by eliminating the current severe traffic congestion problem. This intersection has been listed for several years as a project consideration for regional funding. As initial City effort and expenditure of Gas Tax funding to develop a project study will assist in grant application procedures to fully fund this project.

THIS PAGE INTENTIONALLY LEFT BLANK

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses and income. The text explains that proper record-keeping is essential for identifying trends, managing cash flow, and preparing for tax obligations. It also notes that consistent record-keeping can help in resolving any disputes or discrepancies that may arise over time.

The second part of the document provides a detailed overview of the accounting cycle. It outlines the ten steps involved in the process, from identifying the accounting entity to preparing financial statements. Each step is explained in detail, with examples provided to illustrate the concepts. The text highlights the importance of each step and how they interrelate to form a complete and accurate picture of the organization's financial performance. It also discusses common pitfalls and how to avoid them to ensure the accuracy of the financial records.

The third part of the document focuses on the classification of accounts. It explains the different types of accounts used in accounting, such as assets, liabilities, equity, revenue, and expense accounts. It provides a clear understanding of how these accounts are organized and how they affect the financial statements. The text also discusses the importance of using the correct account codes and how this helps in maintaining a systematic and organized accounting system. It emphasizes that proper classification is crucial for accurate financial reporting and analysis.

The fourth part of the document discusses the process of journalizing and posting. It explains how transactions are recorded in the journal and how they are then posted to the ledger. The text provides a step-by-step guide to this process, including the use of debits and credits. It also discusses the importance of double-checking the entries to ensure accuracy and balance. The text notes that journalizing and posting are fundamental skills for any accountant and that they form the basis for all other accounting activities.

The fifth part of the document covers the preparation of financial statements. It explains the different types of financial statements, such as the balance sheet, income statement, and cash flow statement. It provides a detailed explanation of how each statement is prepared and what information it provides. The text also discusses the importance of these statements in providing a clear and concise overview of the organization's financial health. It emphasizes that accurate financial statements are essential for making informed decisions and for communicating the organization's performance to stakeholders.

The sixth part of the document discusses the importance of reconciling accounts. It explains how and why accounts should be reconciled and provides a step-by-step guide to the process. The text notes that reconciling accounts is a critical step in the accounting cycle that helps to identify and correct any errors or discrepancies. It emphasizes that regular reconciliation is essential for maintaining accurate financial records and for ensuring the reliability of the financial statements.

The seventh part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses and income. The text explains that proper record-keeping is essential for identifying trends, managing cash flow, and preparing for tax obligations. It also notes that consistent record-keeping can help in resolving any disputes or discrepancies that may arise over time.

The eighth part of the document provides a detailed overview of the accounting cycle. It outlines the ten steps involved in the process, from identifying the accounting entity to preparing financial statements. Each step is explained in detail, with examples provided to illustrate the concepts. The text highlights the importance of each step and how they interrelate to form a complete and accurate picture of the organization's financial performance. It also discusses common pitfalls and how to avoid them to ensure the accuracy of the financial records.

The ninth part of the document focuses on the classification of accounts. It explains the different types of accounts used in accounting, such as assets, liabilities, equity, revenue, and expense accounts. It provides a clear understanding of how these accounts are organized and how they affect the financial statements. The text also discusses the importance of using the correct account codes and how this helps in maintaining a systematic and organized accounting system. It emphasizes that proper classification is crucial for accurate financial reporting and analysis.

The tenth part of the document discusses the process of journalizing and posting. It explains how transactions are recorded in the journal and how they are then posted to the ledger. The text provides a step-by-step guide to this process, including the use of debits and credits. It also discusses the importance of double-checking the entries to ensure accuracy and balance. The text notes that journalizing and posting are fundamental skills for any accountant and that they form the basis for all other accounting activities.

The eleventh part of the document covers the preparation of financial statements. It explains the different types of financial statements, such as the balance sheet, income statement, and cash flow statement. It provides a detailed explanation of how each statement is prepared and what information it provides. The text also discusses the importance of these statements in providing a clear and concise overview of the organization's financial health. It emphasizes that accurate financial statements are essential for making informed decisions and for communicating the organization's performance to stakeholders.

The twelfth part of the document discusses the importance of reconciling accounts. It explains how and why accounts should be reconciled and provides a step-by-step guide to the process. The text notes that reconciling accounts is a critical step in the accounting cycle that helps to identify and correct any errors or discrepancies. It emphasizes that regular reconciliation is essential for maintaining accurate financial records and for ensuring the reliability of the financial statements.
