City of Pomona
505 South Garey Avenue
Pomona, CA 91766

July 1, 2008

The Honorable Mayor and Members of the City Council

Please find herein the proposed 2008-2013 Capital Improvement Program (CIP) for the City of Pomona. The Capital Improvement Program is submitted annually to the Pomona City Council in accordance with Section 1010 of the Pomona City Charter.

This document provides a comprehensive plan of capital improvements that are proposed to be undertaken by the City over the next five (5) years. Cost estimates and financing methods for the improvements are included in the program and are referenced by individual project.

The development of the City's Capital Improvement Program is one of the more complex and multi-faceted processes in the City. Striking a balance between the needs and interests of the residents and the financial capacity of the City is a challenging proposition. Balancing these priorities, while at the same time being cognizant of the fiscal challenges of our City, means that not all priorities can be addressed. Foregoing capital improvements often is a typical response to constrained financial times, and that has happened to an extent again this fiscal year.

The total five-year CIP sets forth infrastructure needs and a capital plan involving 330 projects, totaling approximately \$381.5 million, of which \$226 million has been funded. The \$226 million is comprised of \$217 million of prior years' appropriations, of which approximately \$164 million remains unspent, and \$9.4 million of new funding.

Streets – As adopted, the street category consists of 40 funded, 29 partially funded, and 39 unfunded projects for a total of 108 projects that are estimated to cost over \$151 million. Funding has been approved for the addition of \$8.1 million for 12 new projects to this category. The major increase to this category is related to the Mission / SR71 grade separation at \$4.9 million funded by Prop C and STPL and various street rehabilitation projects funded with Proposition 1B.

Traffic – As adopted, the traffic category consists of 28 funded, 9 partially funded, and 26 unfunded projects for a total of 63 projects that are estimated to cost \$8.8 million. Funding has been approved for the addition of \$127,205 for 6 new projects to this category.

Parks and Facilities – As adopted, the parks and facilities category consists of 23 funded, 6 partially funded, and 5 unfunded projects for a total of 34 projects that are estimated to cost over \$101.6 million. Funding has been approved for the addition of \$769,081 for 7 new projects to this category.

Water – As adopted, the water category consists of 84 funded, 1 partially funded, and 5 unfunded projects for a total of 90 projects that are estimated to cost over \$93.2 million. Since the 2007-08 CIP obligated more than \$51 million of bond proceeds for 79 new water projects, funding has been approved for the addition of only \$313,750 for 1 project to this category.

Sewer – As adopted, the sewer category consists of 22 funded and 1 partially funded project for a total of 23 projects that are estimated to cost over \$18.1 million. There are no new projects planned for 2008-09 since the 2007-08 CIP obligated \$13 million of bond proceeds for 12 new sewer projects.

Storm Drains – The storm drain category consists of 3 partially funded and 3 unfunded projects that are estimated to cost over \$3.4 million with no new projects or funding planned for 2008-09.

Miscellaneous – The miscellaneous category consists of 5 funded and 1 partially funded projects that are estimated to cost over \$5.5 million with no new projects or funding planned for 2008-09.

The projected expenditures on all projects for future Fiscal Years (2009/10 - 2012 & beyond) is provided primarily for planning purposes and is not a commitment of funds. Expenditure approval will be sought for these projects as funding becomes available.

As you are aware, the recent passage of Proposition 1B by the California voters will bring much needed improvement dollars to the City and surrounding areas. The City of Pomona will receive \$5.1 million of the proceeds for local improvements over a two-year period. The first year allocation of \$2.6 million has been included within this CIP.

In closing, I would like to express my appreciation to the City Council for providing input into the development of the Capital Improvement Program, as well as to the many staff members who worked towards the development of the projects herein contained.

Respectfully submitted,

Linda Lowry City Manager

<u>VERVIEW</u>

The City of Pomona's Five-Year Capital Improvement Program identifies improvements and additions to our considerable stock of capital infrastructure such as land, buildings, roads, parks, sewers, water lines, traffic signals, and other property. As a guideline, all improvements or modifications to City facilities of \$10,000 or greater are capitalized as individual projects. The multi-year capital plan will provide Council members and managers with a guide that communicates both the program need or deficiency, as well as the funding requirements. It is important to note that projects which do not receive funding in a given year are moved to future years in order to communicate to those with decision-making responsibility the need to provide the necessary funding or, through re-evaluation, eliminate the project entirely.

An important part of the capital plan is the statement of on-going maintenance and operational costs associated with the development or implementation of a new project or program. In some cases, a project may be suspended for a year or more because funding is not available for the on-going maintenance and operational costs.

As with any type of development project, it is important that each individual project or program from each department be consistent with the overall goals and objectives of the City as directed by the City Council. The City currently uses the General Plan, and Councilmember input, as guides to direct citywide development and infrastructure improvements. Projects are also developed following the Council adopted Water, Park, and Sewer Master Plans.

IP OBJECTIVES

The Capital Plan is a key element in the City's overall financial plan. Specifically, the Capital Plan is prepared in order to meet the following objectives:

- Maintain the public facilities vital to both Pomona residents and businesses, such as water and sewer lines, parks, and streets.
- Reduce long-term operating costs by making permanent improvements in areas that otherwise need constant maintenance dollars.
- Encourage the economic expansion of Pomona's economy. This activity results in an increase in the local tax base, providing additional funds for both capital and operating purposes.
- Maintain sound neighborhoods.

HE PROCESS

Each department within the City is requested to submit proposals for each project within its range of influence. City staff also meets individually with Councilmembers to discuss and identify Councilmembers projects of interest and priorities. These projects are submitted to the City Council for its review and approval. After project approval by the City Council, the individual implementation phase of each project such as design preparation, land

acquisition, and award of construction that exceeds \$125,000 still requires City Council approval. Amendments to the CIP also require City Council approval.

RGANIZATION OF THE CIP

The CIP is broken into eight sections. The first section contains the introduction, table of contents, listing of revenue sources, and summaries. The subsequent seven sections contain detailed project data for the following categories: Streets, Traffic, Parks & Facilities, Water, Sewer, Storm Drains, and Miscellaneous Capital. Within each category, project information is broken down by the funding status e.g. funded, partially funded, and unfunded.

APITAL IMPROVEMENT POLICIES

- The City will construct all capital improvements in accordance with an adopted capital program.
- The City will develop a five-year plan for capital improvements to be updated annually. Future capital expenditures will be projected annually for a five-year period based on changes in the community population, real estate development, or replacement of the infrastructure.
- The City will coordinate preparation of the Capital Improvement Program Budget with preparation of the Operating Budget. Future operating costs associated with new capital improvements will be projected and included in Operating Budget forecasts.
- The City will identify the estimated costs and potential funding sources for each proposed capital project before it is submitted to Council for approval.
- The City accounting records are maintained in full accordance with Generally Accepted Accounting Principles (GAAP), as established by (GASB). The basis for budgeting is also in accordance with GAAP virtually without exception.

ONCLUSION

In combination with the City's General Operating Budget, the Capital Improvement Plan links the City's Master Plans (Park, Water, Sewer) and fiscal plan to physical development. It focuses attention on community goals, needs, and capabilities while achieving optimum use of taxpayer dollars. The CIP enhances opportunities for participation in federal and state programs while improving intergovernmental and regional cooperation. The plan encourages a more efficient governmental administration to better manage and preserve the City's investment in its facilities, infrastructure, and development projects. Overall, it is a plan that enables us to better serve the citizens and businesses in the community of Pomona.

ESCRIPTION OF REVENUE SOURCES

Assembly Bill 2766 (AB 2766) - State funds that are available to implement programs and projects that reduce air pollution from motor vehicles.

Assembly Bill 2928 (AB 2928) - As amended by Senate Bill 1662, established the Traffic Congestion Relief Fund (TCRF) in the State Treasury for allocation to cities and counties for street or road maintenance or reconstruction (or storm damage repair). Cities and counties are required to maintain their existing commitment of general funds for street or road work in order to remain eligible for allocation of the specified funds.

Assessment District - The City Assessment Districts 283, 284, 294 and 297.

Bike Trail Grant (Senate Bill 821) -Established legislation that adopted the California Bicycle Transportation Act and provides funds for City and County projects that improve safety and convenience for bicycle commuters.

California Heritage Program Grant — Granted under the Safe Neighborhood Parks, Clean Water, Clean Air and Coastal Protection Bond Act of 2000, funds are available statewide on a competitive basis for the acquisition, development, rehabilitation, restoration, and interpretation of archeological and historical resource preservation projects.

California Workforce Housing Grant (WFH) - The WFH program is designed to encourage cities and counties to develop new residential housing while rewarding those jurisdictions that approve housing affordable to low income households and are in compliance with State housing element law. The program provides for capital asset projects that benefit the community and add to the community's quality of life.

Capital Outlay Fund - The fund used to account for the accumulation of the cost of capital projects. Funding for projects may come from transfers from other funds, contributions and interest on investments.

Community Development Block Grant (CDBG) - CDBG are Federal funds allocated to local government based on a formula. The funds are required to be applied for and used within a broad functional area such as community development and improvement.

Contribution - This funding source is provided by outside agencies donating funds to a particular project of interest.

Developer Fees (Park Dwelling, Roads/Highways; Traffic Signal; and Public Safety Improvement Funds) -Fees generated by development applications to offset the effect of development to include parks, roads, traffic and pubic safety. Fees are based on the cost of the project at the time of building permit application.

Federal Highway Administration (FHWA)

- FHWA is focusing on a number of highpriority efforts to help reduce congestion on the nation's highways in support of the Congestion Relief Initiative. These include Pricing, Tolling Public & Private Partnerships, and efforts derived from the best of existing technological and operational practices. Together, these efforts provide information that allow for informed decisions. better more coordination and quick action that help and reduce traffic congestion. avoid Authorized funds are for use in coordination, facilitation, documentation, and draft report writing.

Gas Tax (State) – Gas tax revenue is based on a flat amount assessed per gallon on all purchases within California, therefore revenue only increases or decreases based on amount of gallons sold rather than the

cost of fuel. The state collects 32 cents per gallon of which 3.39 cent per gallon is distributed to cities on a per capita basis. Usage is limited to street and right of way maintenance and improvements.

Getty Grant - Grants available to eligible grantees including governmental agencies that own historic buildings (Fox Theater) or sites in Los Angeles County. Grants are awarded for the research, documentation, and analysis necessary to identify preservation needs and develop a conservation plan.

Legal Proceedings Restitution - The return of something to the original owner, or to the person entitled to it.

Low/Moderate Housing Funds - Funding source is available from the City's Redevelopment Agency. State law requires that 20% of gross RDA tax increment revenue be set aside to fund housing opportunities for low-and moderate-income families.

Metropolitan Transportation Authority (MTA) Technology Grant – A grant utilizing Federal Aid Urban (FAU) Funds available to the City for purpose of bringing on-line services to the Pomona community.

Metropolitan Water District (MWD) Grant - The MWD grant funds projects that develop local water sources, improve regional water supply reliability, reduce the need for future MWD capital improvements, and reduce the demand for Colorado River water.

Mobile Source Air Pollution Reduction Review Committee (MSRC) Local Government Match Program - The MSRC's Local Government Match Program provides co-funding to cities and counties within the South Coast Air Basin for the purchase of eligible alternative fuel vehicles. Co-funding is matched against a local government's AB2766 Subvention Funds or other local funds.

Parking Facilities Fund - Funds available through the sale of Vehicle Parking District parking lots.

Proposition A - A voter-enacted (1980) 1/2-cent sales tax in Los Angeles County. LA County Metro (MTA) is responsible for administering the funds. The purpose of the funds is to be used to improve and expand public transit within LA County. Funds flow to MTA, which allocates to itself and other agencies on a per capita basis.

Proposition C – A voter-enacted (1980) 1/4-cent sales tax for transit related to freeway, State highway, and public mass transit improvements. Generally awarded to LA County MTA, the County, Cities and local agencies through the Metro Call for projects or other MTA Board action. Recipients must provide for ongoing maintenance and operations of funded projects. The funds may be used on new or improved facilities that reduce congestion such as carpool lanes, transit ways, signal coordination improvements on arterial streets used by transit, grade separations, incident management programs, arterial widening, interchanges, ridesharing, and bond debt service.

Proposition 1B - Funding source is available from a \$19.92 billion dollar in infrastructure bond for various transportation projects to rebuild California. An allocation of \$950 million has been made with \$550 million to cities from the Local Street and Road Program.

Proposition 12 - Grant funds intended to provide funds for investment in neighborhood park and recreation sites to increase recreational opportunities that provide positive social experiences.

Proposition 40 - Funding source is available to the City from the Clean Water, Clean Air, Safe Neighborhood Parks and Coastal Protection Act. The funds are provided on a per capita basis for the

acquisition and development of neighborhood parks.

Proposition 42 - Beginning in FY 2006, 40% of the total Prop 42 funds are allocated for local streets and roads purposes; 20% to Counties based on miles and vehicles and 20% to cities based on population. The funds are used for street and highway maintenance, rehabilitation, reconstruction, and storm damage repair.

Redevelopment Agency Bond Funds (RDA) - The RDA bonds include Series S, Series T, Series W, Series Y, Series AD, Series AH and Series AI.

Redevelopment Agency Funds - The Agency has the authority to pay for public improvements that will be repaid from tax revenue received by the Agency. The size of the bond issue is depending on the amount of tax revenue received. No additional tax is paid by properties within the redevelopment area. The Agency receives its revenue from its ability to collect the full amount of taxes paid by all new development (above а base figure established by the County), rather than sharing this tax growth with other agencies, except as specified in various pass-through agreements.

Refuse Fund - Refuse operational monies available from providing refuse services to City residents.

Revenue Bonds - The Local Agency Revenue bonds include Series AL, AM and Series AN. These bonds were issued to provide funds to redeem the Refunding Improvement Bonds, Assessment District No. 294 and to finance certain capital improvements in the City and to fund a reserve account for the Bonds.

Safe, Accountable, Flexible, Efficient, Transportation Equity Act - Legacy for Users (SAFETEA - LU) - Signed into law on August 10, 2005, and provides for highways, highway safety, and public transportation to improve safety, reduce

traffic congestion, and other activities related to solving transportation problems. This new program takes off where STP, TEA-21, and ISTEA left off.

San Gabriel & Lower Los Angeles Rivers and Mountains Conservancy - Capital funds for our grant program come from a series of propositions approved by the voters: Propositions 12, 13, 40, 50, and 84. These grant funds are to be used for improvements to Urban Lands, Rivers and Tributaries and Mountain Hills and Foothills.

Series S Bonds – Redevelopment Bonds issued within the Indian Hill Project Area. Since the project area merger, these funds may be used within any redevelopment project area.

Series T Bonds – Redevelopment Bonds issued within the South Reservoir Project Area. Since the project area merger, these funds may be used within any redevelopment project area.

Series W Bonds – Redevelopment Bonds issued within the Southwest Project Area. Since the project area merger, these funds may be used within any redevelopment project area.

Series Q Bonds – Sewer revenue bonds issued to provide resources for capital infrastructure improvements; refunded with Series AF in 2002.

Series AA Bonds – Water revenue bonds issued in 1999 to refund Series A and provide resources for capital infrastructure; refunded with Series AY in 2006.

Series AC Bonds – Water revenue bonds issued in 1999 to refund Series A and provide resources for capital infrastructure; refunded with Series AY in 2006.

Series AD Bonds – Redevelopment Bonds issued in 2001 by the Merged Project Area, proceeds of which may be used within any redevelopment project area

Series AF Bonds – Sewer revenue bonds issued in 2002 to refund Series Q and provided additional capital for sewer infrastructure improvements.

Series AG Bonds - Certificates of Participation are General Fund Lease Financing to provide funds to refinance public improvements. Funding source for the COP is lease payments from the City to the PFA.

Series AH/AI Bonds – Redevelopment Bonds issued in 2003 by the Merged Project Area, proceeds of which may be used within any redevelopment project area.

Series AU Bonds - Certificate of Participation are General Fund Lease Financing to provide funds to make advances to the RDA to finance a public parking facility and infrastructure improvements. Funding source for the COP is lease payments from the City to the Public Financing Authority.

Series AX Bonds- These Tax Increment Revenue Bonds were issued to defease Series L and finance certain improvements in the Merged Redevelopment Project Area. The funding source for these bonds are pledged tax revenue from the Merged RDA Project Area.

Series AY Bonds – Water revenue bonds issued in 2006 to refund Series AA and AC and to provide resources for capital infrastructure.

Series BA Bonds – Sewer revenue bonds issued in 2007 for sewer capital infrastructure improvements.

Sewer Revenue Bonds - The Sewer Bonds include Series Q, Series AF and Series BA. The funding source of the bonds is sewer user fees.

Sewer Fund - Sewer operational monies available from providing sewer services to City residents.

Surface Transportation Program (STP) (STPL) and Transportation Enhancement Activities (TEA and TE) - Federal funds available for local agencies to improve the safety and efficiency of the local transportation system. Funds are available for both the planning and construction phases of projects.

Vehicle Parking District - Funds available through collection of parking permits and citations at the Vehicle Parking District lots in the downtown section of Pomona.

Water Fund - Water operational monies available from providing water goods or services to City residents.

Water Revenue Bonds - The water bonds include Series AA, Series AC, and Series AY. The funding source of these bonds is water user charges and other miscellaneous water related revenues.
